

I would like to research how patients receive information from doctors by testing patient understandings of the same diagnosis delivered in different mediums and formats.

Concept

A photograph of a desk with various items: a black pen holder with pens and scissors, a small potted plant in a white pot, a pair of glasses, a gold paperclip, and a notebook with a marble pattern and the word 'STILL' on it.

Concept

I would like to research how patients receive information from doctors by testing patient understandings of the same diagnosis delivered in different mediums and formats.

7 x 9

Educational content enriching patient diagnoses.

Patients often don't understand or don't know how to respond to diagnoses. Doctors would be able to add notes and recommendations to an application that provides educational content relevant to a diagnosis or laboratory result to help increase patient comprehension.
